## **Declaration of Asbestos-free Spare Parts**

Until the late 1980's asbestos was commonly utilised in the industry for sealing and insulation purposes.

Already for many years, asbestos has been recognised as being harmful to human health. For this reason, the utilisation and distribution of asbestos materials have been controlled, restricted and finally banned as part of the European Community Regulation (EC) 1907/2006.

From 1<sup>st</sup> of January 2005, the placing on the market and use of asbestos has been prohibited by the European Community.

---

For the above mentioned reasons, Wärtsilä Global Logistics Services (WGLS) declares that asbestos is banned from all of its processes.

The list of banned substances referred to as asbestos is the following:

EC Number	650-013-00-6
CAS Number	12001-29-5
	12001-28-4
	132207-32-0
	12172-73-5
	77536-66-4
	77536-68-6
	77536-67-5
ICSC Number	0014
RTECS Number	CI6478500
UN Number	2590
